across marketing and customer care interactions.

WHATSAPP FOR BUSINESS

~ The futuristic way of Customer Care.

“ A Dimensions Data study reveals that nine out of ten consumers would prefer using messaging to communicate with businesses, and, according to Nielsen, 56% would rather message customer service than speak on the phone. ”

WIDER REACH

With a reach of 1.5 billion users globally, WhatsApp is becoming the leading chat-app-partner of choice for enterprises to provide customer self-service and support, to initiate and automate routine customer conversations with seamless agent assistance.

Is your company willing to straightaway cut off such a big portion of your potential clientage?

ENHANCED ENGAGEMENT

Existing high engagement on whatsapp for day-to-day communication drives higher involvement, conversion and delivery rates for businesses using Whatsapp as their promotional channel.

Is your company willing to spend it's hard-earned resources on avenues that have nearly zero visibility and conversions?

EVOLVING PREFERENCES

With the changing global scenario and shift to digital platforms and hectic schedules, tech-savvy and busy customers prefer communicating through messages rather than using and holding onto the IVR Service for long until they get their queries solved.

Is your company willing to stick to obsolete methods of communication and lose the existing customers to better services of competitors?

If not, Connect with Trring Me to take your business on WhatsApp!
